CONFIDENTIALITY NOTE

The documents accompanying this facsimile transmission contain information from the law firm of Williams, Morgan & Amerson which may be confidential and/or privileged. The information is intended to be for the use of the individual or entity named on this transmission sheet. If you are not the intended recipient, be aware that any disclosure, copying, distribution or use of the contents of this faxed information is prohibited. If you have received this facsimile in error, please notify us by telephone immediately so that we can arrange for the retrieval of the original documents at no cost to you.

Examiner Ortiz:

In response to our prior discussion, please refer to the claim amendments provided below.

Amendments were made to independent claims 1, 11, and 21, which are now allowable.

Additionally, as we discussed, independent claims 31, 33, and 35 are allowable as they are.

Therefore, in light of the amendments, all of the independent claims, as well as their respective dependent claims, in the present application are now allowable. Please contact me with any questions or comments. Thank you.

CLAIM AMENDMENTS

1. (Currently Amended) A method comprising:
measuring at least one characteristic parameter [[of processing]] relating to a rapid thermal processing step performed on a workpiece [[in a processing step]]; modeling the at least one characteristic parameter measured using a correlation model; and
applying the correlation model to modify the processing performed in the processing step.

11. (Currently Amended) A computer-readable, program storage device, encoded with instructions that, when executed by a computer, perform a method comprising:
measuring at least one characteristic parameter [[of processing]] relating to a rapid thermal processing step performed on a workpiece [[in a processing step]]; and

modeling the at least one characteristic parameter measured using a correlation model; and

applying the correlation model to modify the processing performed in the processing step.

21. (Currently Amended) A computer programmed to perform a method comprising:
- measuring at least one characteristic parameter [[of processing]] relating to a rapid thermal processing step performed on a workpiece [[in a processing step]];
- modeling the at least one characteristic parameter measured using a correlation model; and
- applying the correlation model to modify the processing performed in the processing step.
